

ALEXANDRU MIHALAȘCU

Full-Stack Developer at Huawei, building internal platforms used daily by 100+ engineers across Huawei's technical support teams, with React, Node.js, and SQL backends. Promoted from an OSS role into a dedicated developer position after shipping automation tools that save the team 8-10 hours weekly. Independently ship production SaaS apps with Next.js, React, Firebase, and Stripe payments - full end-to-end ownership.

STACK

LANGUAGES:

Javascript, Typescript, Python

FRONTEND:

React, Next.js, Vue 3, Tailwind, MUI, shadcn/ui

BACKEND&DATA:

Node.js, Express, REST, MySQL, PostgreSQL,

MongoDB, Firebase, Supabase

TESTING & DEVOPS:

Jest, Vitest, Playwright, Git, CI/CD, Docker, Vercel

INTEGRATIONS:

Stripe, Firebase, Google Calendar API

LANGUAGES

Romanian - Native

English - Advanced

German - Basic

EDUCATION

Romanian-American University @ Bucharest

Bachelor's Degree in Economic Informatics
2021-2024

- Relevant coursework: Web Development, Databases (MySQL, Oracle SQL), OOP, Statistics.

EXPERIENCE

Huawei @ Bucharest, Romania

Progression: Intern → OSS Engineer → Full-Stack Developer (Dec 2024 - Present)

Full-Stack Developer

September 2025 - Present (concurrent with OSS Engineer role)

- Architect and build internal platforms used daily by 100+ engineers: React frontends, Node.js / Express APIs, and MySQL and GaussDB backends deployed through CI/CD pipelines.
- Designed and shipped browser extensions, automation scripts, and CLI tools that cut a recurring workflow from ~2 hours to under 15 minutes, saving the team an estimated 8-10 hours per week.
- Own features end to end: requirements, data modeling, REST API design, UI, code review, and deployment.

OSS Engineer

February 2025 - Present

- Resolve L1 / L2 tickets (200+ to date) for international enterprise clients on Huawei NCE Campus and related network-management platforms.
- Primary point of contact between clients and Huawei R&D across multiple time zones: reproduce issues, gather diagnostics, escalate complex cases, and coordinate resolution in English.

Internship

December 2024 - February 2025

- Hands-on datacom rotation (VLAN, IP routing, Ethernet switching, SAN/NAS/RAID, servers) plus LTE/5G architectures, core network protocols, and BSS/OSS software stacks.

Verde Smart Data @ Bucharest, Romania

Student Internship

May- June 2023

- Built internal web tools (Vue.js, Vuetify, Feathers.js, Node.js, MongoDB) and Puppeteer automation pipelines integrated with the OpenAI API for data processing.

PROJECTS

RKC Rent-A Car @ raikomp.ro

Stack: React, Firebase, Material UI

- PWA for a car-rental business with a client portal and admin back-office: online reservations, automated contract generation, fleet management, and rental calendar.

Psychotherapy Platform @ mihaela.mhlsq.ro

Stack: React, Firebase, Material UI

- Production SaaS for a psychotherapy practice: online booking with Google Calendar sync, Stripe payments, role-based admin dashboard, and PWA support. Tested with Vitest and Playwright.

Selected from 14 shipped projects - full portfolio at mhlsq.ro
